

# Khan Renewables Energy (Private) Limited

## Summary of Waste Characterization Study

### 1 – Introduction

As part of the overall feasibility study for the proposed Waste to Energy Plant at Jam Chakro landfill site, a waste characterization study was conducted to understand the composition of the different kinds of waste making its way to the same landfill. In this regard, special focus was placed on the Garbage Transfer Stations (GTS) of Karachi, where waste from the city accumulates before being transported in larger vehicles to the Jam Chakro landfill site. In this regard, 4 GTSs were identified in collaboration with the Sindh Solid Waste Management Board (SSWMB) as being the major contributors of waste to the Jam Chakro site:

S. No.	GTS Site	Location
1	Imtiaz	District Korangi
2	Dinga Morr	District Central
3	Sharafi Goth	District Malir
4	Dar ul Suroor	District Central

Note: A detailed account of the areas that these GTS sites serve is attached as Annex I.

### 2 – Methodology

Subsequent to defining the areas of interest for the waste characterization surveys, the methodology adopted for the different parts of the survey included:

- a. Sampling was conducted as per **EN15442** (methods for sampling of solid recovered fuels), where a day was allocated to each GTS site. On this respective day, 750 kg of waste was sampled from different trucks leaving the site for the landfill, with waste from the trucks being taken from different portions of the trucks at different times of the day (i.e., waste was taken from the bottom of some trucks, from the center of the waste pile in others, and from the top of the pile in others) to ensure stratified random sampling.
- b. Sorting was conducted manually through **EN15440** (solid recovered fuels – methods for determination of biomass content), where a trained team of 11 different personnel was appointed to manually go through the waste in a cool and dry area and sort into the following categories:
  - Paper/Cardboard
  - Wood
  - Other Organic Material
  - Textile
  - Rubber
  - PP > 5 cm (Polypropylene – medicine & etc bottles)
  - HDPE > 5 cm (High Density Polyethylene – oil, shampoo, cleaning products)
  - PET > 5 cm (Polyethylene Terephthalate – water & drink bottles)
  - Other Plastics > 5 cm
  - Diapers, Sanitary Towels
  - Drink Cartons (Tetra Pack)
  - Other Combustible Materials
  - Hazardous Waste
  - Electric & Electronic Waste

- Other Waste
- Glass
- c. Samples for lab testing were prepared using the sorted fractions as per **EN15443** (Methods for sample preparation of Solid Recovered Fuels), where 5 kg samples were prepared.
- d. Lab testing was conducted to identify the following parameters of the first 12 categories listed above:
  - Moisture Content
  - Calorific Value
  - Ash Content
  - Carbon/Nitrogen Ratio
  - Total Organic Matter

The campaign conducted involved sampling of wastes leaving for the landfill site from the GTSs on two separate occasions, where the above-described process was repeated for each site on the following days:

S. No.	GTS Site	Location	Campaign	
			1 <sup>st</sup> Day	2 <sup>nd</sup> Day
1	Imtiaz	District Korangi	21/02/2023 Tuesday	28/02/2023 Tuesday
2	Dinga Morr	District Central	22/02/2023 Wednesday	01/03/2023 Wednesday
3	Dar ul Suroor	District Central	23/02/2023 Thursday	02/03/2023 Thursday
4	Sharafi Goth	District Malir	24/02/2023 Friday	03/03/2023 Friday

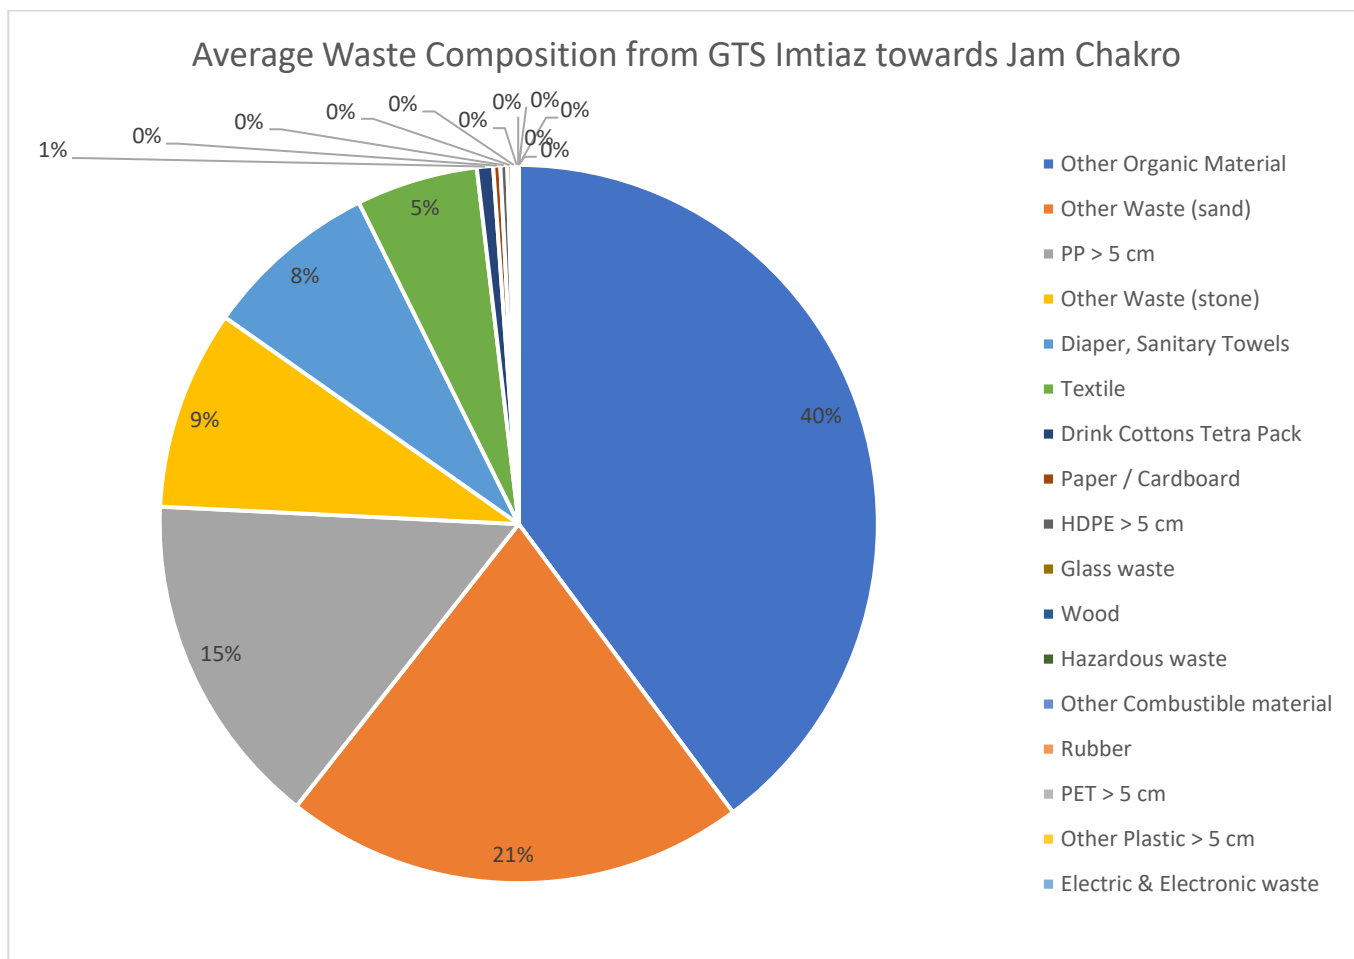

### 3 - Findings

The findings from the survey for each of the sites are given below:

#### Imtiaz

As depicted in the figure below, the average waste composition leaving for the Jam Chakro landfill site from GTS Imtiaz, in descending order, comprises of:

- 39.83% other organic material,
- 20.8% other waste (sand),
- 15.15% PP> 5cm,
- 8.99% other waste (stone),
- 7.89% diapers and sanitary towels,
- 5.48% textile,
- 0.73% drink cartons/ tetra pack,
- 0.31% HDPE> 5cm,
- 0.2% Glass,
- 0.17% Wood,
- 0.09% hazardous waste (medical),
- 0.05% other combustible material, and
- 0% for rubber, PET> 5cm, other plastics > 5cm, and electric/ electronic waste.

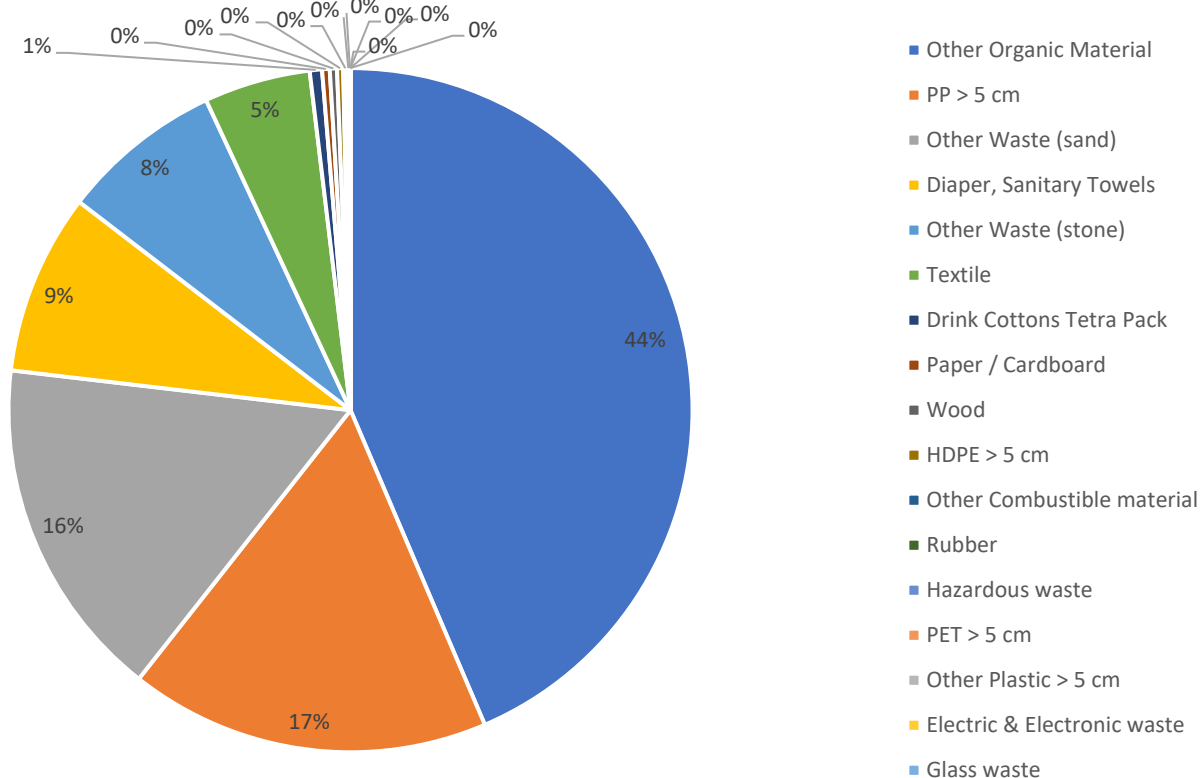

### **Dinga Morr**

As depicted in the figure below, the average waste composition leaving for the Jam Chakro landfill site from GTS Dinga Morr, in descending order, comprises of:

- 43.58% other organic material
- 17.05% PP > 5 cm
- 16.24% Other waste (sand)
- 8.56% Diapers and Sanitary Towels
- 7.64% Other waste (stone)
- 5.03% textile
- 0.58% drink cartons/ tetra pack
- 0.36% cardboard
- 0.34% wood
- 0.28% HDPE > 5 cm
- 0.19% Other combustible material
- 0.09% Rubber
- 0.06% Hazardous waste
- 0% PET > 5cm, Other Plastic > 5cm, Electric/ Electronic Waste, & Glass

Average Waste Composition from GTS Dinga Morr towards Jam Chakro

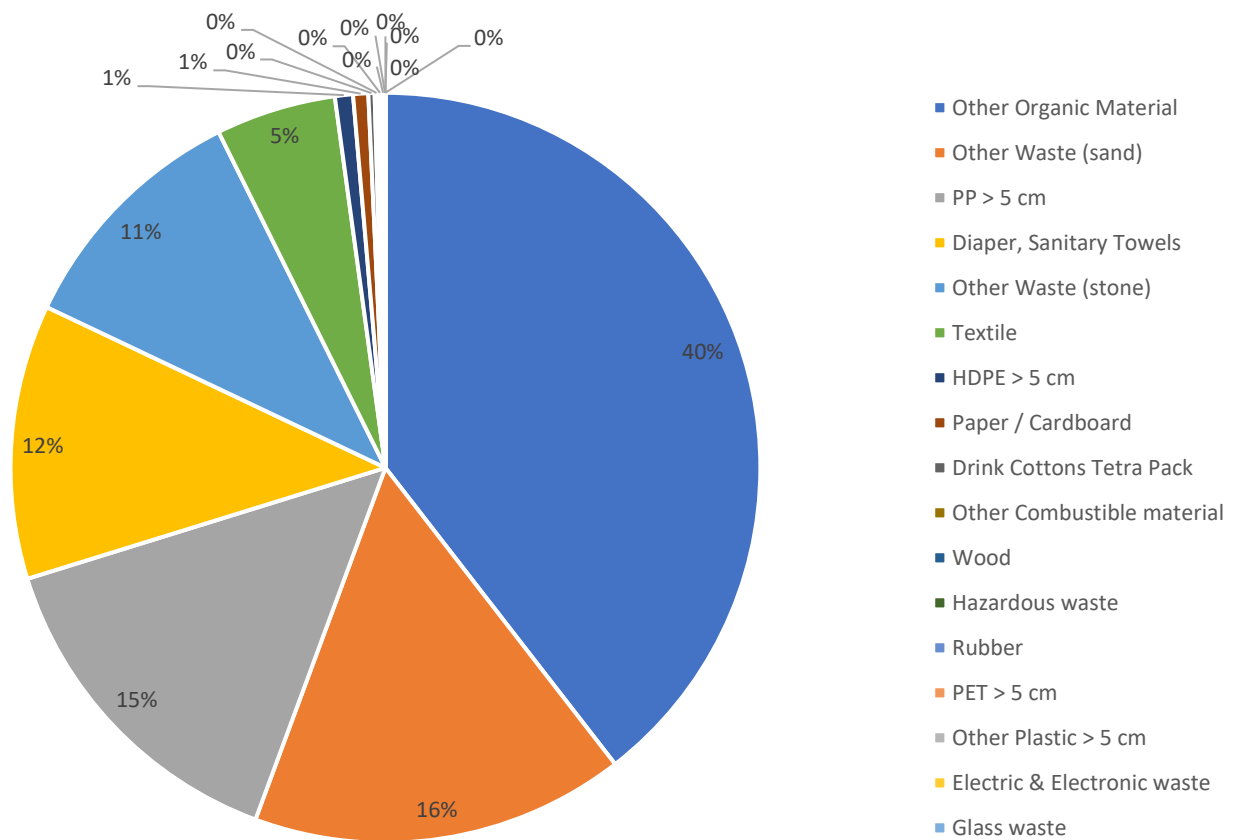

### Dar Ul Suroor

As depicted in the figure below, the average waste composition leaving for Jam chakro landfill site from GTS Dar ul Suroor, in descending order, comprises of:

- 39.50% other organic material
- 16.13% other waste (sand)
- 14.58% PP > 5cm
- 11.83% Diapers and Sanitary Towels
- 10.61% other waste (stone)
- 5.18% textile
- 0.78% HDPE > 5cm
- 0.65% paper/cardboard
- 0.27% Drink cartons/ tetra pack
- 0.16% other combustible material
- 0.14% wood
- 0.12% hazardous waste
- 0.04% rubber
- 0% PET > 5cm, Other Plastic > 5cm, Electric/ Electronic Waste, & Glass

Average Waste Composition from GTS Dar ul Suroor towards Jam Chakro

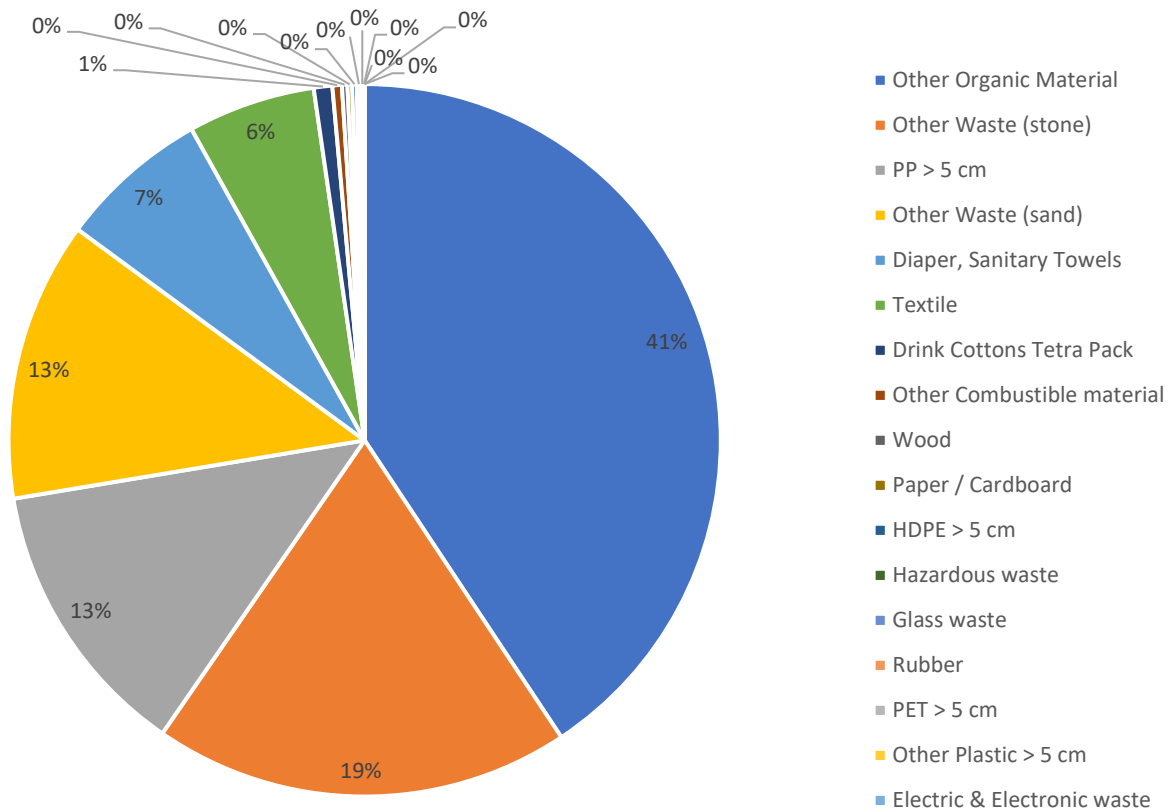

### Sharafi Goth

As depicted in the figure below, the average composition leaving for Jam Chakro landfill site from GTS Sharafi Goth, in descending order, comprises of:

- 40.68% Other organic material
- 18.93% Other waste (stone)
- 12.76% PP > 5cm
- 12.71% Other Waste (sand)
- 6.83% diapers and sanitary towels
- 5.79% textile
- 0.84% drink cartons/ tetra pack
- 0.43% other combustible material
- 0.25% wood
- 0.21% paper/cardboard
- 0.21% HDPE > 5cm
- 0.19% hazardous waste
- 0.11% glass waste
- 0.05% Rubber
- 0% PET > 5cm, other plastics > 5cm, Electric & Electronic Waste

Average Waste Composition from GTS Sharafi Goth towards Jam Chakro

### **Overall Findings & Conclusion**

From the overall trends observed across the type of waste surveyed, the waste making its way to the Jam Chakro landfill site comprises majorly of organic material, single use plastics (polypropylene), sand, stone, and textile (clothes). Everything that can be recycled or refurbished to an extent is taken out at the GTS sites by waste pickers including PET bottles, and electric/ electronic waste.

## Annex I – Waste Dumping Points for City of Karachi (Before Landfilling)
